Hi Doug - Thank you for the information about this Thursday and Friday.

Hello again Ana, Carol, Debbie, Doug, Wanda and David,  
I set up the following Doodle poll so we can find a convenient time to meet next week. Please go to this website: <http://doodle.com/2me36r2me7pswr9i> and mark the time frames that you are available. Please note that you need to click "Show all 27 options" to view all of the options that I have outlined. If you have any questions, please don't hesitate to let me know.

We look forward to working with you.

Best,  
Kirby

Next week probably makes more sense, there is a technical conference on the Passaic on Friday and Thursday is pretty booked.

Hi Doug,  
Thank you for your response and yours and Debbie's willingness to meet this afternoon. If it is at all possible, we are hoping to meet everyone at the same time. Would Thursday or Friday before noon be an option or should we take a look at next week? I can also set up a Doodle poll if that would be the easiest way to find a meeting time.  
Thank you,  
Kirby

Hello Ana, Carol, Debbie, Doug, Wanda and David,  
My name is Kirby Webster and I work on EPA's Technical Assistance Services for Communities (TASC) contract. As David mentioned, we have received the request from EPA for TASC support for your CAG. I would like to set up an introductory phone call for next week to introduce ourselves and begin discussing

the project. Myself and Terrie Boguski, one of our senior technical advisors, are available to chat anytime on Monday October 15, or before noon eastern on Thursday October 18 or Friday October 19. If you could all let me know your availability, hopefully we will be able to find a time convenient for everyone next week. In the meantime, if you have any questions please feel free to contact me using the below information.

We look forward to working with you.

Thank you,

Kirby

Doug, Carol, Debbie & Ana:

Kirby Webster with SKEO will be contacting you soon to set up an introductory planning call for providing the CAG technical assistance support. I provided Kirby with the resource documents list and your contact information. The sooner this call can take place the better. I am copying Wanda Ayala, Regional TASC coordinator, and Freya Margand, Headquarters TASC coordinator on this request.

Wanda and I would like to be on the conference call that is set up. I am traveling to Missouri tomorrow to visit family thru next Wednesday. I will try to join the call from Missouri so please proceed as quickly as possible to get this rolling. I have worked with Kirby on Pompton Lakes and she is very skilled and enjoyable to work with.

Here is the request that has been provided to SKEO to get this first round of support started:

"Technical assistance will focus on the cleanup options being considered for remediation of the lower eight miles of the Passaic River (Diamond Alkali Superfund site) in New Jersey. The CAG is seeking assistance in developing a side-by-side "life cycle" comparison of three sediment management options: Contained Aquatic Disposal; Thermal Treatment; and Land Disposal. Specifically, the CAG is interested in looking at the current state of technology, environmental impacts, quality of life impacts, public health and safety impacts and possibly other factors for each of the three disposal and treatment options. EPA is scheduled to release the proposed plan for public review and comment in March 2013. The CAG is seeking a phased approach with technical assistance.

Support for the Passaic River CAG includes:

- Conference call with the CAG leadership and the technical advisor. This discussion would help the CAG focus its questions and issues that require more in-depth technical assistance during the period leading up to the Proposed Plan.
- Identifying resource documents that would be most important for a technical review and summary. A list of potential resource documents is provided as a starting point.
- Developing a list of issues and questions that the CAG would like addressed along with a schedule for completion of the review.

Deliverables:

Conference call, as scheduled with CAG.

Conference call summary

List of resource documents: As scheduled during call with CAG.

List of issues/questions: As scheduled during call with CAG."
